

Master of Science in Global Supply Chain Management

The MS Global Supply Chain Management program builds on Krannert's core strengths in operations, supply chain management, and business analytics to provide students with skills that will well position them for a career in managing global supply chains. In addition to courses that will develop contextual knowledge and problem-solving skills, the program provides unique global project experience. The program includes students from Krannert's global university partners, enabling a sharing of internship and work experiences.

RANKINGS

#2 Supply Chain & Logistics (World)

Eduniversal (Best-Masters.com)

#8 Supply Chain & Logistics (U.S.)

U.S. News & World Report

"In three words I would describe the Krannert experience as relevant, engaging and intellectually stimulating. There is an abundance of networking opportunities. The onus is on the individual, and if done correctly it can be very rewarding. I also had unique opportunities to hear from corporate leaders on the future of supply chain technology. It was very eye-opening."

Asmita Parashar, '18 MS GSCM
